

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ---

THE following List, as complete as could be procured, contains about two thousand of the Monumental Brasses existing in England. It is acknowledged by all who take an interest in the subject, that it would be very desirable that a list of these valuable memorials should be made; but the great difficulty of making it a perfect one, through the uncertainty there must always be, without personal investigation, as to the present existence of those noticed in the older topographical works, has hitherto deterred many from forming anything but a private catalogue. It is from a conviction that a perfect list will never be had, unless an *imperfect* one is first put forth, that the writer has been induced to publish the following pages in their present state: and, accordingly, he trusts that all who are able to assist in the undertaking, will furnish him with any additions or corrections it may be in their power to supply. No name has been admitted where the actual existence of the brass is uncertain: all have been taken from rubbings, church-schemes, &c., in the possession of Architectural Societies, and of private individuals; or from very recent publications, if described as still remaining, such as the *Archæological Journal*, &c. Many have therefore been omitted which may reasonably be *supposed* to be still existing: the Norfolk list, in particular, might be rendered much more complete if all those en-

graved by COTMAN could be depended upon : but some were lost in his time, and several have gone since. Mere inscriptions, unless of early date, or remarkable in any way, have been generally omitted.

*A Chronological Index* as far as the end of the fourteenth century has been added to the List, for the sake of easy reference to the most important Brasses ; which, it is hoped, will increase the utility of the work.

The Suffolk list may be considered a complete one of the brasses containing figures in the county : for which the writer desires to thank D. E. DAVY, Esq., of Ufford ; and for further kind assistance he is indebted to L. A. B. WALLER, Esq., ÆNEAS B. HUTCHISON, Esq., RAPHAEL BRANDON, Esq., H. HAINES, Esq., Exeter College, Oxford, A. W. FRANKS, Esq., Trinity College, Cambridge, &c.

Communications to be addressed to C. R. MANNING, Esq., Corpus Christi College, Cambridge : or, Diss Rectory, Norfolk.

Thomas de Stop was admitted to the Rectory of Hemming 27 Mar 1341  
& died probably at the close of 1346 his will having been proved on 7 Jan  
of the following year (archives of the see of Rochester Reg. Rains de Hethu.  
f. 194b) since there is no date on the brass, which is still as perfect as  
when first laid down, it is not improbable that the monument was  
placed in the church during his lifetime. (E. H. W. Dunker No 24 See  
xii. 167.)
